Q-SOL⁺ INDUSTRIAL IONIC NANO COPPER DISINFECTANT

PROVEN ^{24h} EFFECTIVENESS

SPECIALLY MANUFACTURED AND PACKAGED FOR fourways^o

KILLS CORONAVIRUS + BACTERIA + MOLD + FUNGI

*18-24 hours of antiviral protection against the Corona Virus

- ✓ ALCOHOL-FREE
- ✓ FRAGRANCE-FREE
- ✓ NON-FLAMMABLE
- ✓ NON-STICKY
- ✓ ECO-FRIENDLY
- ✓ NON-TOXIC
- ✓ CHLORINE-FREE
- ✓ NO RINSING REQUIRED

Q-SOL INDUSTRIAL IS AN IONIC NANO COPPER DISINFECTANT SPRAY FOR THE APPLICATION OF AIRCON FILTERS AS WELL AS FOR ANY SURFACES AND MATERIALS.

APPLICATION GUIDELINES FOR AIRCON UNITS:

- Remove the filter from the unit as per the manufacturers guidelines. Wash the filter and ensure all dust and debris are removed from it
- Let the filter dry
- Spray the Q-Sol Industrial onto the filter, ensuring it has been fully covered. (For larger filters used in AHU's and ducted type units, spray only the entry face side)
- Let the filter rest for at least 10 to 15 minutes so any excess Q-sol solution can self disperse across the surface
- Insert the filter back into the filter housing as per manufacturers guidelines
- For smaller type HVAC units, where applicable, you can wipe down the front panel of the unit with a clean cloth that has been sprayed with Q-Sol solution. The filter and front cover can be treated on a daily basis. There is no need to wash the filter every day, you need only spray the Q-sol Industrial on it.

PRECAUTIONS:

- Do not apply the Q-SOL Industrial to the filters whilst they are installed in the unit. The Q-SOL can be corrosive to certain metals
- Do not let the Q-SOL Industrial come into contact with any PCB or sensors (Always remove filters from the units before applying the product)
- Do not let the Q-SOL be sprayed into eyes, nose or mouth. If this occurs rinse with large volumes of clean water
- Do not apply the Q-SOL to metal surfaces, such as ducting, evaporator coils, unit metal panels or metal trimmings

AVAILABLE IN A 1L, 2L, 5L AND 25L
READY 2 GO SOLUTION

CONCENTRATE
1:20
MIX RATIO

TESTED PATHOGENS:

Coronavirus, Staphylococcus aureus, Escherichia coli (E.coli) & Salmonella typhimurium.

For External Use Only.

INGREDIENTS:

Ionic Cupric Copper, Reverse Osmosis water.
